**PEI RATING**

The Porcelain Enamel Institute ( PEI ) came up with a testing system to rate the strength of the glaze on a tile.

**PEI RATINGS ON GLAZED TILE – Very Light Traffic**

These Tiles can be used on all Indoor Wall applications, Interior Light use Countertops such as Bathroom Vanities, and Light Traffic Floors.

**PEI 2 – Light Traffic**

These Tiles can be used on all Interior Wall Applications, All Interior Countertop applications, and Light Traffic Floors.

**PEI 3 – Moderate Traffic**

These Tiles can be used on all Interior Wall Applications, All Interior Countertop applications, and all Residential Traffic Floors.

**PEI 4 – Moderate to Heavy Traffic**

These Tiles can be used on all Interior Wall Applications, All Interior Countertop applications, all Residential Traffic Floors, and Light Commercial Traffic Floors.

**PEI 5 – Heavy Traffic**

These Tiles can be used on all Interior Wall Applications, All Interior Countertop applications, all Residential Traffic Floors, and Heavy Commercial Traffic Floors.

I hope this information gives you a better understanding and enough knowledge to help you select the right tile for your application.
